Mohamed Hesham

Penetration Testing

mohamedhesham1033@gmail.com | +201011625709 | Cairo, Egypt | linkedin.com/in/mohamed-heshame-093232300

github.com/0xHaxmed

SUMMARY

Highly motivated Penetration Tester with hands-on experience in web application security, firewall deployment, and vulnerability assessment. Conducted practical security assessments across labs on PortSwigger Academy and offensive-security environments. Skilled in identifying vulnerabilities, evaluating risk severity, and network diagnostics. Seeking an entry-level security testing role.

EDUCATION

Helwan International Technological University (HITU), B.Sc. in Cybersecurity **2023 – 2027**

PROFESSIONAL EXPERIENCE

Network Engineer, Taramatic **2024 – 2026** | Cairo, Egypt

• **Technical Leadership & Career Growth:** Promoted to Network Engineer for operational excellence; standardized team workflows and site topology documentation.
• **Large-Scale Field Rollouts:** Directed 20 FortiGate firewall deployments across 3 governorates in 11 days, alongside rack cabling and CCTV setup.
• **Network Troubleshooting & Uptime:** Resolved router migration static-IP outages via subnet isolation and network scanning, preventing user downtime.

InfraStructure & Security - Vulnerability Analyst and Penetration Tester **07/2026 – 12/2026** | Cairo, Egypt
Digital Egypt Pioneers Initiative (DEPI)

- **Hands-on Penetration Testing & Vulnerability Assessment:** Conducted end-to-end security evaluations across web applications, networks, and Android environments, executing attack simulations and compiling comprehensive remediation reports.
- **Freelancing & Client Delivery:** Trained in freelancing methodologies to deliver cybersecurity services independently, including client communication, project scoping, and actionable security reporting.
- **Cross-Functional Collaboration & Soft Skills:** Developed key professional soft skills to bridge the gap between security and engineering—collaborating across diverse teams, presenting technical findings, and guiding developers on effective vulnerability mitigation.

Cybersecurity Summer Camp, Information Technology Institute (ITI) **07/2026 – 08/2026**

- Completed 120 hours of hands-on training covering networking fundamentals, information security principles, and ethical hacking.

SKILLS

Web Application Security
Web Application Penetration Testing, Security Posture Assessment, Authentication & Authorization Testing, Business Logic Validation, Input Handling & File Upload Security, Remediation Guidance.

Network Security
TCP/IP Networking, FortiGate Firewall Deployment & Configuration, Network Troubleshooting, Static/Dynamic IP Diagnostics, Structured Cabling

programming
Python (Security Automation & Data Collection), Bash Scripting

SOFT SKILLS

Technical Report Writing, Communication & Collaboration, Problem Solving, Analytical & Critical Thinking, Attention to Detail, Adaptability & Continuous Learning, Leadership & Team Guidance

PROJECTS

Silent Scraper Academy - Vulnerable Web Application Lab **01/2024 – 06/2024**
Second-Year Graduation Project | Node.js, Python, FastAPI, PHP

- Designed and implemented a vulnerable web application lab (PHP apps via XAMPP) within a full-stack cybersecurity platform to simulate real-world exploitation in an isolated environment.
- Developed the platform architecture using Node.js, Python (FastAPI), and integrated subdomain enumeration and reconnaissance tooling.

CERTIFICATES

Junior Penetration Tester (TryHackMe)

Cybersecurity Essentials (Cisco Networking Academy / MCIT)

Introduction to Python (Cisco Networking Academy)

Pre-Security & Cybersecurity 101 (TryHackMe)
